

My Early Years

myView
BUILDING CONNECTIONS

Information is accessible in the app in text, video and leaflet formats. This can be updated easily

Child Health And Wellbeing

Child Health and wellbeing

Children's health is an integral part of their emotional, mental, social, environmental and spiritual well-being and is supported by attention to these aspects. The attached leaflet summarises key requirements during early years, and how to support this.

Questionnaires

Please press 'Start' or 'Resume' to go to your questionnaire

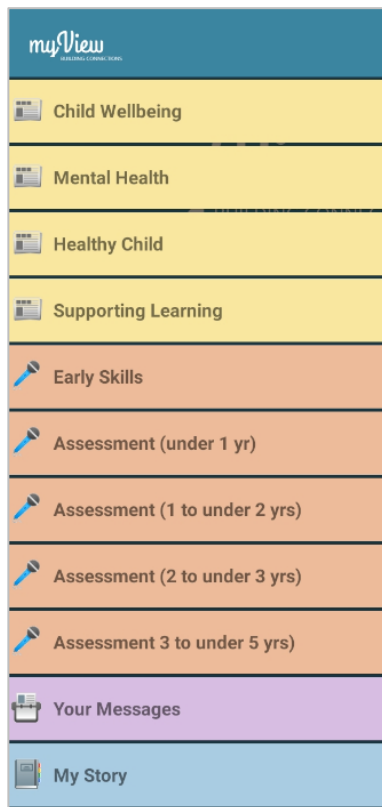

**Child Assessment
(3 to 5 years)**

Start

Age-related assessment questionnaires can be undertaken.

Questionnaires can be added or removed, for example to survey particular issues.

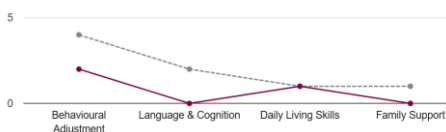

Responses are stored separately in a secure online database unique to each organisation using the app. Data is not stored on the app

Notifications can be sent to some or all app users.

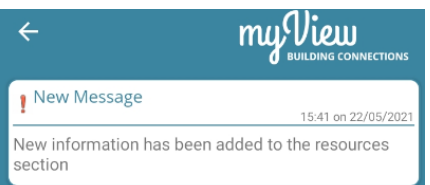

| | |
|---|-------|
| Score (a total of the 4 scores below) | 3 / 3 |
| Behavioural Adjustment Score | 2 / 1 |
| Language & Cognition Score | 0 / 6 |
| Daily Living Skills Score | 1 / 6 |
| Family Support Score | 0 / 6 |

Individual reports can be displayed on the app, or accessed separately through **Viewpoint Analysis**.

Scales in questionnaires are calculated automatically and displayed in a range of formats: text, graphs and charts.

Aggregate data reports can also be generated to identify common issues or concerns

STORY ENTRY

Created: 22/05/2021

Story date: 07/08/2016

Hari and her mum. Hari loved being cuddled and her mum enjoyed being with her. It's good that Hari can see herself with her mum. This is an important early memory

My Story allows pictures and text to be added to build a pictorial record of a child's early years including pictures of key people, places and mementoes.
