

## Viewpoint Information System

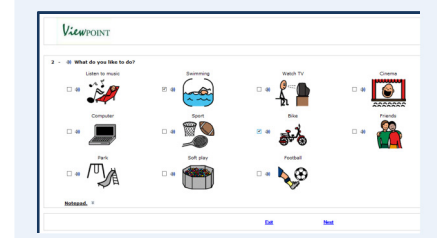

Viewpoint is a communication medium for collecting and reporting information. It can be accessed in three different formats

With graphics and avatars speaking text

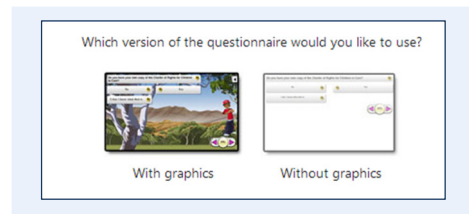

Without graphics and with text that can be read aloud

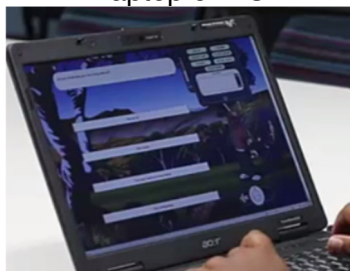

With either graphic or photo symbols and read aloud text

All formats can be accessed from one web address. When a person starts a questionnaire options to select the format are available.

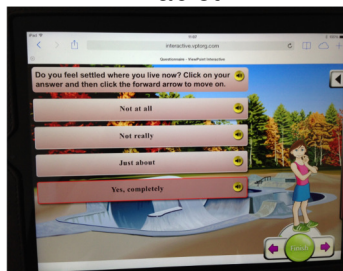

All Viewpoint formats can be accessed from a range of devices

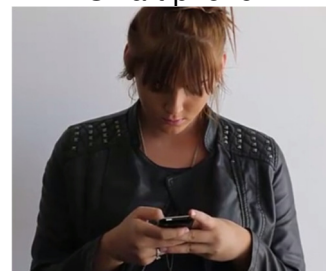

Laptop or PC

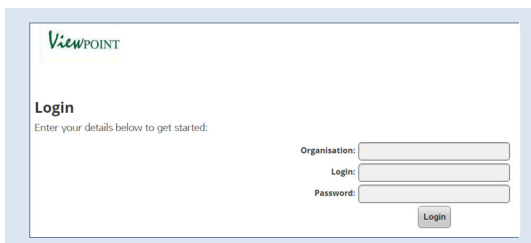

Tablet

Smart phone

**Text Messaging** Some people prefer to access Viewpoint from their Smart phones. Functionality is available in the Viewpoint Management Centre to send text messages and reminders with login information to individual phones.

Viewpoint Apps are available for offline use. The Viewpoint Direct App will work on all laptops and tablets providing Viewpoint without graphics versions and versions with symbols. Device specific Apps are available for Windows, Android and Apple devices providing access from these devices to all Viewpoint formats

## Viewpoint Management Centre

Permission based access to

- User Management functions
- Analysis for data reporting
- Text Messaging functionality
- Questionnaire building and publishing
- Learning and Development Hub access providing online resources to support the use of Viewpoint
